# PCMA for SAP ECC

Payment Card Management and Analytics (PCMA) is the component used to integrate SAP to the B2B Gateway for authorization and settlement processing and provides the B2B Receivables, Analytics and Reconciliation value added solutions within SAP.

These release notes cover the following full and patch releases:

| PCMA Version | Transport Files | Release Date |
|---|---|---|
| 3.3.0 full | K900961.B60 R900961.B60 | 19 Sept 2023 |
| 3.3.1 patch | K900984.B60 R900984.B60 | 7 Nov 2023 |

NOTE: For information on prior releases, refer to the Paymetric Assist help site.

## New Features and Enhancements

| 3.3.0 New Features and Enhancements |
|---|
| **Multi-capture Config Enhancement:** Ability to change multi-capture parameter configuration if a QA system is not locked down for editing. |

| 3.3.1 New Features and Enhancements |
|---|
| N/A |

## Problems Addressed

| **3.3.0 Problems Addressed** |
| --- |
| **Multi-Capture Structure Changes:** Changes made to use standard SAP CCAUT_R structure for multi-capture workflow to avoid errors if it contains appended values. |
| **3.3.1 Problems Addressed** |
| **Repeat Settlement:** Changes were made to address errors occurring when running Repeat Settlement with certain processing parameters. |

## Compatibility and Basic Requirements

The following is applicable for both 3.3.0 full and 3.3.1 patch release.

- SAP ECC 6.0, ABAP 702 Support Pack 0018 minimum
- Paymetric SAP components:
    - PAS - 2.10.0
        - NOTE: This release should be backwards compatible back to PAS 2.8.0; however, it was tested with 2.10.0. If you are implementing tokenization through TMS, 2.10.0 minimum is required.
    - XiSecure SAP ECC IK – 3.5.0

## Install and Configuration Notes

### New Installs

| Version 3.3.0 | Install this full transport first. |
| --- | --- |
| Version 3.3.1 | Then install this patch transport which has a fix related to running the Repeat Settlement program. |

Refer to the *XiPay Platform SAP ECC Integration Guide* for install, setup, and integration details.

## Upgrades

If you are on a version prior to the latest full transport, install the full one and all subsequent patch transports.

- If you are on a version later than the latest full transport, verify all patch transports between your version and the latest are installed before installing the latest.
- For ALL upgrades, even if PCMA IMG modifications are not required for the upgrade, you must execute the PCMA IMG transaction code (/n/PMPAY/PIMG) to initiate the objects from the upgrade.
- When importing the transport(s):
  - The '**overwrite existing objects**' flag should be selected since many of these are existing objects.
  - Allow sufficient time for each transport to complete before loading the next one to prevent syntax errors.
- Any custom changes (including userexits configured in the PCMA IMGs) should be evaluated and may need to be replicated in the new later versions of these userexits. There may be new userexits that were not in your previous version - please review the documentation for details.
- If upgrading from a previous/older version of PCMA, it is advised you recreate any custom userexits that are configured in /PMPAY/PIMG. They should be recreated based on the new sample default userexits that are provided.
- As always, please test thoroughly before moving to PRD. If you would like to obtain consulting assistance with this install, please contact Support Services.

## Objects Modified

This section identifies any objects modified that should be considered when upgrading if you have customizations a stated above under Upgrade section.

- N/A

## Supporting Integration Documents and Transports/Installers

- XiPay-PCMA SAP ECC Integration Guide
- PCMA_SAP_ECC.zip
